

Dear Parents

We are looking for parents and siblings of people with ASD/ Asperger Syndrome to participate in a new research project called TUKS (Taiwan – United Kingdom Siblings project). The project focuses on the experiences of siblings of people with autism. The research will involve you – the parent – and your child *without* autism. Siblings (brothers or sisters) who are aged 9 – 17 years and who don't have an autism diagnosis are welcome to participate. The research will only involve post and e-mail contact and there are no home visits or clinic appointments. Your child with autism will not take part directly.

If you are interested in finding out more, please look at our study website: [www.clickeast.co.uk/tuks](http://www.clickeast.co.uk/tuks)

Or get in touch with me directly by emailing [tuks@ed.ac.uk](mailto:tuks@ed.ac.uk)

If you contact us we'll send out some more information to help you and your family decide whether you want to take part.

Thank you

Joy Tsai
