'Working Together' Reducing Health Inequalities for Young People with a Learning Disability

PARENT CARERS TOGETHER

Bournemouth Christchurch Poole

Background:
The NHS Long Term Plan (LTP) was published in January 2019 and outlines the priorities and areas of work that the NHS as a whole, will be working towards over the next 5 years.

One aspect of the LTP is a stronger NHS action on health inequalities.
"More to ensure that people with learning disability and autism or both can live happier, healthier, longer lives (LTP 2.31)"

What does the LTP mean for young people with special educational needs or disability:
Local plans are being put in place to improve the following:

- GP Learning Disability Registers
  What are they, who should be included and why they are important.
- Annual Health Checks
  What they are, why they are important, how to prepare and what to expect
- Health Action Plans
  What you should expect after the annual health check

Would you like to earn a £25 Love2Shop Voucher?

Does your young person have a learning disability?

Are they age 14 or over?

Mystery Shoppers Wanted!

We are looking for parent carers to share their experience of adding their young person to the GP's learning disability register and/or requesting an annual health check by completing a short survey.

To take part simply text 'mystery shopper' and your name to 07827 793244

The Parent Carer Forums, *Dorset Parent Carer Council* and *Parent Carers Together* are working together with Dorset Clinical Commissioning Group.

The aim of this project is to improve the long term health of people with a learning disability. To achieve this aim we really need your help.

Your experience will help to identify workforce training needs and inform the content of future resources for both families and for GP teams.

Thank you for your help.
